2. Then for one thousand and five hundred years nothing was heard of them. The modern Olympic Games began again in 1896 and nine countries took part in them. The Olympics took place in Greece, but after that every four years the Olympic moved to another city.
3. The Olympic Games take place every four years. During the two world wars there were no Olympic Games because they can't take place in a country which is at war. During the Olympic Games there are competitions in many kinds of sport like running, jumping, swimming, athletics and others.
